Agricultural covers are polypropylene sheets traditionally used to cover agricultural fields. However it can be used for various other purposes like Grain pile covers, livestock curtains, shade covers, trailer covers, hay covers, for freeze control, tree base wraps, field covers, protection from birds, insects, heat absorption and retention, reflection etc. The product is lightweight, easy to handle, and provides superior protection from water, dirt, dust, UV and IR radiation and many chemicals. Our fabrics woven, stabilized polypropylene, has a long history of outdoor performance. The fabric is tightly woven and may require wind relief slits if it is installed in areas of high wind. Our covers are lightweight, strong and resistant to both abrasion and chemicals. These sheets are available in two forms

I. PP Un-laminated Sheets

-- up to 400 cm wide

II. PP Laminated Sheets

-- up to 240 cm wide

Protection for crops. Our tough fabric row covers are perfect for protecting low growing, high value field crops from frosts, wind, cold, and birds. The woven, semi-clear fabric allows sunlight, air, and water through to the plants. You can use the fabric alone or over wire hoops. The covers are strong, durable, and can last for many growing seasons. Supports required during high ice situations.

Field Covers provide excellent Protection from the elements

- € Protects row crops from wind, cold, frost, and birds.
- € Helps trap ground heat to warm crops.
- € Allows sunlight and water through to crops.
- € Prevents excessive heat build up.
- € Reusable for many seasons.

Charbhujja Derivatives Agricultural covers

Our covers help keep crops warmer, reduce heating costs. Get the most heat for your money. Our fabrics help maximize the efficiency of your heating system by trapping more valuable heat in your structure and helping insulate crops from chilling and drying winds. Our Fabrics are semi clear to give you greater daytime warming. The fabric's woven design allows air to circulate and rain water to drain through. Great for winter roofs, side wall panels, and interior curtains.

- Long lasting, high UV resistant, multi-season protection.
- Helps trap heat and reduce heat loss.
- Blocks wind and allows rain to drain.
- Easy to remove for ventilation.
- Lightweight, easy to work with.
- Allows in sunlight for daytime warming

- Typical Characteristics:
 - Blocks wind and helps reduce heat loss.
 - Allows in 60% sunlight, 40% shade factor.
 - Diffuses light for reduced "hot spots".
 - Woven to allow air and water through.
 - Highly UV stabilized.

Grain pile covers protect your Precious farm produce

All these materials for commercial and industrial clients and are not available to home and garden retail users. Commercial minimums apply.

Charbhujja Derivatives Agricultural covers

Polypropylene Ground Cover

Constructed of black, woven polypropylene, this material will protect your landscape investment. Allows air, water and other nutrients to pass through while preventing weed growth. Has a UV inhibitor to prevent deterioration from sunlight. Has striping in regular intervals across width to allow for cutting or pot alignment.

Cold protection for row crops. Our tough fabric row covers are perfect for protecting low growing, high value field crops from frosts, wind, cold, and birds. The woven, semi-clear fabric allows sunlight, air, and water through to the plants. You can use the fabric alone or over wire hoops. The covers are strong, durable, and can last for many growing seasons. Supports required during high ice situations.

- Protects row crops from wind, cold, frost, and birds.
- Helps trap ground heat to warm crops.
- Allows sunlight and water through to crops.
- Prevents excessive heat build up.
- Reusable for many seasons.
